Dear Homeowners,

As the weather warms up and the days get longer, it's time to start thinking about spring lawn care.

Here are a few tips to help you get your lawn off to a great start this season:

1. Start by raking up any leaves or debris that have accumulated over the winter. This will help your lawn to breathe and promote new growth.
2. Once your flower bed is clear, apply a layer of fresh mulch. This will help to keep the soil moist and protect the roots of your plants.
3. Next, it's time to fertilize your lawn. A good rule of thumb is to apply 1 pound of fertilizer per 1000 square feet of lawn.
4. Finally, be sure to water your lawn regularly. Deep, infrequent watering is best for promoting deep root growth.

By following these simple tips, you'll be on your way to a beautiful, healthy lawn this spring! For any more helpful tips please visit the link below.
